

## SAFETY AND SECURITY

The safety and security of our children has always been of paramount importance at Harbor Haven. Here are some measures that are in place:

Harbor Haven monitors the entrance/exit of all vehicles and individuals on the premises. Should the need arise for you to pick up /drop off your child at times other than arrival/dismissal, please be understanding if questioned by our security personnel. We utilize a walkie-talkie system to immediately communicate any concerns.

Our staff wears the same Harbor Haven staff t-shirts, so that they are instantly recognizable to all of us. All Harbor Haven staff members undergo thorough annual criminal background checks and are also checked annually through the National Sex Offenders Registry. The front door to the building is locked and monitored by security staff. The Harbor Haven children and staff enter and exit through a side door which is continuously monitored.

Harbor Haven will only release a child to a parent or legal guardian. If the staff member releasing the child, (typically the director, assistant director, supervisor) does not know the parent, we will ask for picture identification. Please do not feel insulted if we do this. If someone other than a parent/legal guardian is picking up your child, please send, fax or e-mail a written note to the office. Please give a code word to that person and to us. We will then ask the person to show us proper identification (photo ID) as well as the code word, before releasing the child.

The West Orange Police and Fire Departments have been notified of the dates of operation of Harbor Haven. Additionally, the emergency rescue squad of West Orange and St. Barnabas Hospital are also given notice of those dates. The response time of any of these emergency teams is under five minutes as we are very close to their locations. In addition we also have a gassed school vehicle with a certified CDL driver on site from 8:45am to 3:45am for emergency purposes.

We have a full time registered nurse on the premises. Our doctor of record is also local. The building, pool and athletic fields are all equipped with AED units. Our full time nurse as well as other staff members are certified to use it.

We put tremendous effort into keeping Harbor Haven risk-free however sometimes risks are unavoidable during games and activities at camp. When children follow the rules we instruct them in so that they can be safe at camp it reduces risk. Please discuss with your child the importance of following camp safety rules at all times.

Occasionally children get a scrape or bump. Our nurse will call you in the unlikely event that your child sustains a more significant injury or even a minor head injury. Should your child become ill during the day, (i.e. fever, vomiting, sore throat, etc...) we will call you to discuss the situation and make a decision about sending the child home. Your child may also be sent home if the nurse and director determine that your child shows signs of something contagious.

Harbor Haven has a written set of emergency procedures. Our staff is aware of how to proceed in a number of different situations. The situations covered include: evacuation of building (fire drill), evacuation of building (relocation to another safe building), clearing the fields and return to building (weather related conditions/other) and "lock down" in the building. The safety of the children is our highest priority.

Should an emergency situation arise which interferes with children returning safely home at the regularly scheduled time, please know that we are prepared to care for your children for an extended period of time. We will communicate with you by phone (calling or texting) in this situation.

Summer camps are defined as mandated reporters by the state of NJ. If we reasonably suspect that a child has been abused or neglected in any environment, whether we hear it first, second or third hand, we are legally required to make a report. In the event that the suspected abuse or neglect involves a family member or friend from the child's home or community, we are prohibited from informing you. This is so the authorities may properly assess the situation. Our goal is to protect children at all times.
